

# MAC

**Maximum Allowable Cost  
Customizable Fee Schedules**

Generic pricing should provide normative (cost plus) pricing for both Plans and Pharmacies. MAC fee schedules should pass all savings to Health Plans and patients. To satisfy pharmacists and Plans the MAC fee schedules should be transparent, updated frequently, and based on customizable criteria. Pro Pharma MAC™ lists can be available on the cloud for all applicable pharmacists to review.

The Pro Pharma MAC™ is customizable by clients using approximately fifty criteria. Criteria include manufacturers, drug classifications, benchmark pricing standards, cost plus formulae, discounting, data sources for bases of cost, benefit design parameters, etc. Changes are made based on access, shortages, and significant price changes.

## ***Important client benefits are:***

- *Anchoring overall trend by reducing generic trend*
- *Pharmacists can buy better when they know what they will be reimbursed*
- *Comply with State laws for transparency*
- *Improve relationships with pharmacy networks*
